

Karen Fady Nabil

Aspiring Cybersecurity Professional | Penetration Testing & Network Security

01126450165 • karenfadywork@gmail.com • Cairo, Egypt • linkedin.com/in/karen-fady • github.com/Toxkay • tryhackme.com/p/ToxKay

PROFESSIONAL SUMMARY

Third-year IT student at Cairo University specializing in penetration testing and network security, with 180+ hours of hands-on training in web application hacking and enterprise network hardening. Experienced in exploiting OWASP Top 10 vulnerabilities using Burp Suite and OWASP ZAP, and in designing secure network infrastructures using Cisco tooling. Ranked in the top 20% on TryHackMe, actively sharpening offensive security skills through real-world lab environments.

EDUCATION

BSc in Computers and Artificial Intelligence — Information Technology

Expected 2027

Cairo University, Cairo, Egypt

CERTIFICATIONS & TRAINING

CNSP – Certified Network Security Practitioner | The SecOps Group

Jul 2026

- Passed with Merit a comprehensive exam covering network security fundamentals, Active Directory, Windows/Linux internals, and privilege escalation
- Demonstrated proficiency in Nmap scanning/evasion, NTLM/Kerberos authentication mechanics, and TLS/cryptography

eWPT Preparation Course | eLearnSecurity

60+ Hours

- Applied OWASP-based methodology for comprehensive web application security assessments
- Manually exploited SQLi, XSS, LFI/RFI, and Command Injection vulnerabilities in realistic lab environments
- Performed OSINT and passive reconnaissance to uncover hidden directories, tech stacks, and weak components
- Tested for broken authentication, misconfigurations, and simulated real-world attack scenarios

Network Security | National Telecommunication Institute (NTI), Egypt

Jul 2025 – Aug 2025

120+ hours of technical training

- Covered CompTIA Security+, CCNA, and hands-on labs with Nmap, Wireshark, and Cisco Packet Tracer
- Configured routers, switches, VLANs, ACLs, and built secure network topologies using Cisco tools
- Gained practical experience in VPNs, firewalls, RADIUS/TACACS+, routing protocols (OSPF, RIP), and device hardening
- Designed and implemented a solo final project simulating a multi-area secure enterprise network environment

DevOps Foundations Crash Course | Orange Digital Center Egypt

1 month

- Hands-on exposure to Linux, Docker, Kubernetes, Ansible, and Prometheus & Grafana
- Introduced to CI/CD pipeline automation using Jenkins with foundational knowledge of modern software deployment

WORK EXPERIENCE

IT Help-Desk Technician | Patriarchal College, Cairo, Egypt

Sep 2024 – Dec 2024

- Resolved hardware and software issues across student and staff devices running Windows and Linux
- Installed, configured, and maintained desktop systems, printers, and peripherals
- Provided first-level server support including backups, service restarts, and user account management
- Developed practical understanding of DHCP, DNS, and file sharing protocols in a live environment

PROJECTS

Network Security Infrastructure Simulation (NETSEC) — Solo Project

- Designed and configured a multi-zone enterprise network using Cisco Packet Tracer, demonstrating real-world network architecture understanding
- Implemented Zone-Based Policy Firewalls (ZPF) and VPNs for secure remote connectivity
- Configured AAA (RADIUS/TACACS+) and ACLs to enforce role-based access control

Vole Machine – CPU Architecture Simulator — Academic Project

- Developed a C++ simulation of a CPU with a custom instruction set, 256-cell memory, and registers R0–RC
- Simulated the full Fetch-Decode-Execute cycle, supporting arithmetic, logic, and program control operations
- Implemented custom 8-bit floating-point and two's complement integer formats

Plateful – Collaborative Web Application — Academic Project

- Built a full-stack recipe management system using Django (Python) and JavaScript
- Implemented secure user authentication with custom sign-up flows and encrypted session handling
- Managed data persistence using Django ORM and SQLite

TECHNICAL SKILLS

Vulnerability Assessment: OWASP Top 10, SQLi, XSS (Stored/Reflected/DOM), CSRF, SSRF, LFI/RFI, Command Injection

Offensive Security Tools: Burp Suite Professional, OWASP ZAP, ffuf, Nmap, Wireshark

Network Security: OSPF, RIP, VLANs, IP Subnetting, ACLs, Zone-Based Policy Firewalls (ZPF), VPN, AAA (RADIUS/TACACS+)

Protocols: TCP/IP, DNS, DHCP, NAT, HTTP/S

Programming Languages: Python, C++, JavaScript, PHP, SQL, Java

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), SOLID Principles

DevOps & Environments: Git, Linux (Kali / Ubuntu), VMware / VirtualBox, Docker, Kubernetes, Ansible, Jenkins

LANGUAGES

Arabic (Native) • English (Academic / Professional) • French (DELF B2)
